CCC

Chicken
with Tuna & Salmon

LIFESTAGE

Sterilised Adult Cat

Sterilisation / neutering is recommended for pet cats, however, it is known to be a risk factor for obesity, as it may lead to an increased appetite and reduced activity level. Our recipe is specifically formulated to help balance against these changes.

Recipe is also suitable for...

Indoor Cats

Weight Control

Senior Cats

Please refer to the Product List for more information about each category.

Connoisseur Cat

The Connoisseur Cat range is specifically developed to provide a selection of high protein and high total animal content recipes that are irresistible to cats.

The range also offers an assortment of the finest freshly prepared animal protein sources with added functional ingredients to help care for the cat's health.

Why Chicken?

Chicken is a lean protein source rich in essential amino acids. It is also a good source of vitamins & minerals including B vitamins and iron which help contribute to overall health and well-being.

Why Tuna?

Tuna is an excellent source of protein and omega 3 fatty acids together with B vitamins and minerals which contribute to overall health and well-being.

Why Salmon?

Salmon is naturally rich in omega 3 essential fatty acids which have anti-inflammatory properties and provide support for skin and coat condition and joint health.

A crunchy kibble texture.

Important: The information provided in this document is GA Pet Food Partners Ltd interpretation of Regulation No 767/2009 including amending Regulations 2017/2279 and 2018/1903. As with all legislation only courts can decide on the correct interpretation of the law. We would advise that you always seek legal advice when creating/printing new packaging, leaflets or websites. The statutory Analytical Constituents declaration parameters (i.e. Crude Protein, Crude Fat, Crude Fibre, Crude Ash) may be used for declaration purposes along with Moisture. Other parameters are intended as a guide and in order to declare extra figures we suggest that analysis work is carried out to confirm levels more precisely. Formulation updates: As information becomes available and in order to continually meet statutory analytical constituent declarations, formulations may have to be adapted to account for raw material variation and availability. There may also be other reasons outside of our immediate control (including but not limited to force majeure events) which warrant the change of a formulation to improve its suitability.
